Summary

Computer Engineer with over three years of professional experience in systems development, maintenance and deployment. Interested in developing solutions, always concerned with usability, maintainability and security.

Education

Bachelor of Computer Engineering
Centro Universitário de Lins

2012-2018

Professional Experience

Systems Analyst
CETECLins – Centro Tecnológico de Lins

2017 – Current

I am responsible for the development of a web geographic information system, focused on the public sector. Using my experience and relying on tools such as PostgreSQL and OpenLayers, I was able to make major system improvements in both performance and usability, handling millions of records from dozens of city halls across Brazil.

- Main tools used include ASP.NET, PostgreSQL, JQuery, OpenLayers and Apache.
- Implementation of various Web Services that were part of the mobile solutions that came with the system.
- Contact with various database technologies, such as Firebird and SQL Server, performing integrations of the cities databases with the system database.
- Use of version control systems, in this case Subversion, together with TortoiseSVN, and Kanban as development methodology.
- Used C# as the main language (C ++ on some occasions), in addition, Javascript, HTML, CSS and Bootstrap.

Freelancer

2011 - Current

Developed several projects, from static websites to web systems, where I gained a lot of knowledge in DevOps and got in touch with other technologies.

- Used MySQL as database in various projects
- Used Git as the version control system in most projects.
- Development of responsive web pages.
- Used ASP.NET, HTML, Javascript and CSS in most projects.
